## About This Game

Have you ever thought to yourself, politics are so simple and the electoral process is perfect? Of course you haven't.

**Megalo Polis** gives you a taste of the insanity by throwing you onto the political trail, rubbing elbows, overselling scant promises, and engineering scandals to become the next President of the United States of America.

There's no rest on the campaign trail in this quick-witted RTS. You'll need to think fast to recognize and seize opportunities to spread your influence... with maybe just a touch of manipulation.

Any great (white) house sits atop a solid foundation. Build your campaign from the ground up as you identify key states, political allies and amass a loyal group of supporters to spread your word and do your bidding. But that's only leg one of this political race. To truly achieve greatness, you'll need to outsmart and outmaneuver your equally hungry rivals.

Budget your time and your wallet as you persuade voters to vote in your favor, by any means necessary. Whether you're making it rain on impressionable students or spreading seedy gossip, you'll want to make it clear you deserve to be top dog. Who said political campaigns were clean business?

**Do you have what it takes to decide the nation's future?**

This game is just down right creepy! At least to me. But I am a big chicken when it comes to horror games. I really like God's Basement because it is the tension of what you cannot see..until see it! Then its just disturbing! I have only just scratched the surface of the game but I played the demo a few months ago and when I saw it was out full release I had to get it. It does get a little tedious sometimes because you have to go back and forth until something changes or a door becomes open, which normally I am down for and I see why they claim to be PT inspired. But sometimes it felt like I was running back and forth from a locked door, down a hallway and back with nothing happening until for no reason the door I was originally trying is open. Other then that it is a really good spooky game, especially for the time of year. I started a lets play series if you want to check it out. Like I said I have only just started the full version but will be doing more in time!

[https://www.youtube.com/watch?v=SxxAYUDZ8\\_A](https://www.youtube.com/watch?v=SxxAYUDZ8_A). this rpg is awesome but for the lord of steam, PLEASE, add more save chances!. Probably the slowest god damn RTS I've ever played in my entire life. So. Damn. Slow.. Where do I start? Fantastic sounds, great operation, "real feel" this pack has it all! I would like to see some Phase III Amfleets, but I'll find some repaints. The Dash-8 is most likely one of the best Packs out there.

Pros;

It's own horn and bell :D

Comes in the Phase III "Pepsi Can"

Smooth Operation

Quick Drive Compatible.

Cons;

No Phase III Amfleets

Over all, 9V10 would buy again!. its the dark souls of anime tidty games. finished getting three stars on all challenges. Fun tower defense game! Standard entry into the genre with a fantasy flair, but a very solid entry, especially for the price. Randomly bombs on sound error....

Save your \$\$\$\$ 6/10

Is an old arcade game. Got cheap and it works.

Pros:

- Classic arcade type gameplay.
- Has secret levels/puzzles (small amount).
- Little or no bugs or compatability issues. (Win 7)

Cons:

- No update to interface. If someone were to re-make this game with nice interface/graphics, this game would become completely redundant.

Other:

- Dated. This game I bought in a bundle with Wake. It was only \$1.29, but it was still way too much money. Graphics were blurry and there was too much bloom effect on the lighting that gave me a headache about 3 minutes in.

I recommend that you do not buy this game.

So far I have only driven the number 45, and I really enjoyed it! The scenery is great and the bus is beautifully modeled and is so cozy and quiet. I really do recommend this DLC.. honestly just a good fun and great game just remember to save lmao. This game is a great racing sim. With the mod support for tracks and cars it is a must have. Also it is on sale in the Born 2 Race 2 bundle at Bundlestars for \$2.49.. good graphic

but  
bad cam view control. Zero Gravity when not touching the track, totally require new skill to get drifting around, oh watch out for asteroids, satellite, and props when you are travelling or you die. All good, everything works great!. Don't let the name fool you. Dave Coverdale's post-Deep Purple bands big hit with a MUST-SEE video clip. This song has one of the most amazing solos of the 80's. John Sykes plays a "rent-is-due" solo, which will challenge all your skills: bending\ sweeping\ string skipping and a vibrato to die for. Enjoy! ...is this the love that I've been searching fooaoor?!. \u2b50\u2b50\u2b50\u2b50\u2b50.  
RURURURURURRU

Now I need to learn how to play Parasoul and Filia to establish worldwide RURURURRUU obeying!

Kula Parasoul looks way too cool too, and mmm... Zone-Tan Squigly! Many many references!

This is beyond awesome!

Buy it, learn them, play while listening to "I want you" Scanty and Kneesocks theme. Enjoy!

RURURURURURURURURU. It's a fun game I guess. Would be better if the gun didn't have so much recoil.

It's called WHAT? Well, who the heck thought that would be fun!? Yeah, I don't get it either.
